Speaking about me, I would like to create the website about cooking. Purpose of my site is to teach people how to cook delicious meals quickly and simply. I will write different recipes

in detail with pictures, I will explain every little thing. So everyone can repeat dishes.

People ^{will be able to} ~~can~~ order all ingredients in my website. They will be delivered in home.

People also will be able to order ready-made food. I think, it is very useful and

convenient for everyone. The site will have recipes of dishes from different countries. But

if people don't want to cook them, they can just order national food. It is great

opportunity to try something new without leaving home.

I would like to create a website that could contain my art-gallery. With the help of this site, I would spread ideas about the beautiful in our world and share my thoughts with fans. Together we

205.

could communicate a lot and come up with something new.

First I would post my drawings on the website and make a forum for communicating. Then, as soon as I have some audience, I will start creating a comic book and posting a new chapter every week. I think it will ~~attract more~~ bring more popularity to my work in this way.

Although I can ask a programmer friend to help me with this, I don't want to do it yet.
